References

1. MISH – Market Information Survey of Households (MISH) is one of the most comprehensive primary data-based annual surveys conducted by NCAER covering a massive sample size of 300,000 households drawn from each district of India. MISH tracks consumer demographics and consumption patterns across a wide variety of product categories by collecting data on manufactured goods.

2. ITOPS – A Bi-annual syndicated study of Office automation market in India. A Half yearly track of the Indian PC, Networking and Software market. This report gives details on the PC / LAN / Printers / UPS / Networking Products / Software / Internet Penetration in terms of their Installed Bases, Market Sizes, etc. The report has an extensive coverage of more than 8,000 business Establishments and more than 6,000 affluent households (SEC A and B) in the 16 cities of the country. This is carried out in association with MAIT

3. ICUBE – Internet In India (or I-Cube as it is known popularly) is an annual study designed to be a strategic tool for the marketers to tap the benefits of the Internet. First initiated in the year 1998, the latest sequel 2001 covers eight modules apart form the main volume. The eight modules are ISP Broadband, Home Shopping, Online Finance, Content Report, Mobile Data Service Report, Online Banking , and Public Access / Kiosk

4. ISP Focuscope- It is a market status directory of the Internet Service Providers who have taken license to operate as an ISP in the country. This directory apart from giving details about the locational details of the ISPs, their key personnel, revenues and investments, gives information on whether they are providing their service and when do they plan to provide.
